Safety Data Sheet

PRODUCT NAME: **Technigro 20-18-18 Plus** **SDS #5011**

Date of Issue: June 24, 2015
Supersedes: March 14, 2014

1. Product and Company Identification

Product Name: Technigro 20-18-18 Plus
Recommended Uses: End-use fertilizer
Restrictions on Uses: None

Manufacturer/Supplier
Sun Gro Horticulture Distribution Inc.
770 Silver Street
Agawam, MA 01001
1-800-732-8667

Distributed in the USA by
Sun Gro Horticulture Distribution Inc.
770 Silver Street
Agawam, MA 01001
1-800-732-8667

Distributed in Canada by
Sun Gro Horticulture Canada Ltd.
52130 RR 65, PO Box 189
Seba Beach, AB T0E 2B0 Canada
1-800-732-8667

For more information: www.sungro.com

For more customer information call:

Western Region:	1-888-797-6497	Central Region:	1-888-982-4500
Eastern Region:	1-888-896-1222	Southeast Region:	1-800-683-7700
Agawam:	1-800-732-8667		

Emergency Telephone Number

For Chemical Emergency, Spill, Leak, Fire, Exposure or Accident Call **CHEMTREC** Day or Night.
For shipments and products within the US and Canada: 1-800-424-9300
For shipments and products travelling outside of the US and Canada: + 1 703-527-3887

2. Hazards Identification

Classification of the mixture

Classification of the chemical in accordance with 29CFR §1910.1200

Hazard Classes and Hazard Categories	Hazard Statements
Not classified as hazardous	None applicable

Label elements

Hazard pictograms None applicable
Signal word None applicable
Hazard Statements None applicable
Precautionary Statements None applicable
Other hazards None

Classification of the relevant ingredients of the mixture in accordance with 29CFR §1910.1200

	Hazard classes and Hazard categories
Potassium Nitrate	Oxidizing solid, Cat. 3
Boric Acid	Toxic to reproduction, Cat. 1B

3. Composition/Information on Ingredients

This product is considered as a mixture/preparation

Ingredients	CAS No.	EC No	Concentration
Potassium Nitrate	7757-79-1	231-818-8	5%-50%
Boric Acid	100043-35-3	233-139-2	<0.1%
Perchlorate (ClO_4^-)*			<0.01%
Iodate (IO_3^-)*			<50 ppm

**This product contains naturally occurring trace amounts of perchlorate and iodate. The components are not regulated by 29CFR §1910.1200. Refer to* www.dtsc.ca.gov/hazardouswaste/perchlorate *and Section 15 for more information regarding California State regulations on handling and disposal.*

4. First Aid Measures

Description of first aid measures

General information

In case of persisting adverse effects consult a physician. Never give anything by mouth to an unconscious person, person having convulsions, or a person with cramps.

In case of inhalation

Remove to fresh air and keep at rest in a position comfortable for breathing. Get medical attention for any breathing difficulty

In case of skin contact

Wash with plenty of soap and water. If skin irritation occurs, get medical attention or advice.

In case of eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists call a Poison Control Center or a doctor.

In case of ingestion

If able, rinse mouth and drink plenty of water. Do not induce vomiting. Call a Poison Control Center or doctor if feeling unwell.

More important symptoms and effects, both acute and delayed

The following symptoms may occur:

In case of inhalation: Irritation to respiratory tract. Delayed lung effects after short term exposure to thermal degradation products

In case of skin contact: May cause redness or irritation

In case of eye contact: May cause redness or irritation

In case of ingestion: Ingestion of large amounts may cause gastrointestinal disturbances

Indication of any immediate medical attention and special treatment needed: Treat symptomatically.

5. Fire Fighting Measures

Extinguishing media:

Suitable extinguishing media: Use any suitable mean for extinguishing surrounding fire. Spray water for small fires. For large fires flood area with water.

Unsuitable material: None, but attention should be paid to compatibility with surrounding chemicals.

Specific hazards arising from the chemical

Thermal decomposition which can lead to the escape of toxic or corrosive gases and vapors.

Thermal decomposition products: Nitrous oxides (NO_x), nitrates, phosphorus oxides, ammonia and metallic oxides.

Protective equipment and precautions for firefighters

Keep upwind of fire. Wear full firefighting turn out gear (full Bunker gear) and respiratory protection (self-contained breathing apparatus (SCBA).

6. Accidental Release Measures

Personal precautions

Provide adequate ventilation Wear personal protection equipment (Section 8).

Environmental precautions

Do not allow to enter into surface water or drains. Ensure waste is collected and contained.

Methods and material for containment and clean up

Take up mechanically, placing in appropriate containers for disposal or recovery.

Unsuitable material for containment or taking up: None specified

Other information

None

7. Handling and Storage

Precautions for Safe Handling

Avoid generation of dust. Provide adequate ventilation. Wear personal protective equipment. Wash hands thoroughly after handling. Do not eat, drink, or smoke when using this product.

Conditions for safe storage, including any incompatibilities

Keep/store only in original container. Store in a well-ventilated place. Keep container tightly closed.

8. Exposure Controls/Personal Protection

Exposure Guidelines: Occupational exposure limits

	Potassium Nitrate	Boric Acid
OSHA - PEL	Not established	Not established
STEL/ceiling	Not established	Not established

ACGIH (2012 TLVs® and BEIs®)

TWA	Not established	2 mg/m^3 (inhal. fraction)
STEL/ceiling	Not established	6 mg/m^3 (inhal. fraction)

Derived No-Effect Level* (DNEL) suggested by manufacturer: Workers (Industrial/professional):

Potassium Nitrate

DNEL Human, dermal, long term (repeated)	20.8 mg/kg/day (systemic)
DNEL Human, inhalation, long term (repeated)	36.7 mg/kg/day (systemic)

Boric Acid

DNEL Human, dermal, long term (repeated)	4800 mg B/day (systemic)

* (Derived No-Effect Level (DNEL) is the level of exposure to the substance above which humans should not be exposed)

Engineering controls

Use exhaust ventilation to keep airborne concentrations below exposure limits.

Personal Protective Equipment

Eye/face protection: Chemical goggles required all the time.

Skin protection: Nitrile rubber gloves, over 0.11 mm thickness, >480 min breakthrough time recommended.

Respiratory Protection: Wear respiratory protection, where airborne concentrations are expected to exceed exposure limits.

General Hygiene Considerations

Avoid contact with eyes and skin. Wash hands thoroughly after handling. Do not eat, drink, or smoke when using this product.

9. Physical and Chemical Properties

Appearance	Solid, granular or crystalline
Color	Pale Blue
Odor	Odorless
Odor Threshold	Not applicable
pH value	No data available
Melting point/freezing range	No data available
Boiling temperature/boiling range	Not applicable
Flash Point	Not applicable
Vaporization rate/Evaporation rate	No data available
Flammable Solids	Not flammable
Explosion limits (LEL, UEL)	Not applicable
Vapor Pressure	No data available
Vapor Density	No data available
Relative Density	No data available
Solubility	> 100 g/L at 20°C/68°F (water)
Partition coefficient n-octanol/water	Not applicable
Auto Ignition temperature	Not applicable
Decomposition temperature	No data available
Viscosity	Not applicable

Other information

Explosive properties	Not explosive
Oxidizing properties	Not an oxidizer

10. Stability and Reactivity

Reactivity

No hazardous reaction when handled and stored according to provisions.

Chemical stability

Stable under normal storage and temperature conditions.

Possibility of hazardous reactions

None identified

Conditions to avoid

None identified

Incompatible materials

None identified

Hazardous decomposition products

Thermal decomposition products: Nitrous oxides (NO_x), nitrites, phosphorus oxides, ammonia and metallic oxides.

11. Toxicological Information

The following information refers to potassium nitrate and boric acid.

Likely routes of exposure (inhalation, ingestion, skin and eye contact)

Eye contact, skin contact and inhalation. Exposure by ingestion is not expected to occur through normal industrial or agricultural use.

Symptoms related to the physical, chemical and toxicological characteristics

May be irritant to the respiratory tract. May cause redness or irritation to the skin and eyes. Ingestion of large amounts may cause gastrointestinal disturbances. May cause delayed lung effects after short term exposure to thermal degradation products.

Toxicological effects from short and long term exposure (No data for the mixture itself)

Acute toxicity:

Acute oral toxicity	LD50:
Acute Toxicity Estimate for the mixture	> 2000 mg/kg bw (additivity formula)
Potassium nitrate	> 2000 mg/kg bw
Boric acid	3765 mg/kg bw

Assessment/classification: Based on available data for the ingredients of the mixture, the classification criteria are not met

Irritant and corrosive effects:

Irritation to the skin	Result	Method
Potassium nitrate	non-irritant	Equivalent/similar to OECD guideline 404
Boric acid	non-irritant	Equivalent/similar to OECD guideline 404

Assessment/classification: Based on available data, the classification criteria are not met

Irritation to the eyes	Result	Method
Potassium nitrate	not irritating	OECD Guideline 405
Boric acid	not irritating	Equivalent/similar to OECD guideline 405

Assessment/classification: Based on available data, the classification criteria are not met

Respiratory or skin sensitization

Skin sensitization	Result	Method
Potassium nitrate	not sensitizing	OECD guideline 429
Boric acid	not sensitizing	OECD guideline 406
Respiratory sensitization	No information available	

Assessment/classification: Based on available data, the classification criteria are not met

Genetic effects: This product does not contain ingredients classified as germ cell mutagens.

	Bacterial (Ames Test)	Chromosomal aberrations	Mutation in mammalian cells
Potassium nitrate	Negative	Negative	Negative
Boric acid	Negative	Negative	Negative

Assessment/classification Based on available data, the classification criteria are not met.

Reproductive toxicity: Adverse effects on sexual function and fertility/developmental toxicity: OECD guideline 422

Potassium nitrate: No adverse effects on fertility/development (NOAEL>1500 mg/kg bw)

(Boric acid may affect infertility but concentration is below threshold of hazardous material classification per GHS regulations)

Assessment/classification: Based on available data for ingredients of the mixture, the classification criteria are not met.

Specific target organ toxicity (single exposure)

The product does not contain relevant ingredients classified as Target Organ Toxicant.

	Practical experience/human evidence
Potassium nitrate	No relevant effect have been observed after single exposure
Boric acid	No relevant effect have been observed after single exposure. No reliable study supports the designation of boric acid as a respiratory irritant.

Assessment/classification: Based on available data, the classification criteria are not met.

Specific target organ toxicity (repeated exposure)

	Organs affected	Effects	Guideline
Potassium nitrate	None	No effects (NOAEL>1500 mg/kg/ bw)	OECD 422

(Boric acid may affect infertility but concentration is below threshold of hazardous material classification per GHS regulations)

Assessment/classification: Based on available data for ingredients of the mixture, the classification criteria are not met.

Aspiration hazard

Physicochemical data and toxicological information does not indicate an aspiration hazard.
Assessment/classification: Based on available data, the classification criteria are not met

Carcinogenicity

International Agency for Research on Cancer (IARC)	Product does not contain ingredients classified as carcinogens
National Toxicology Program (NTP)	Product does not contain ingredients classified as carcinogens
29 CFR part 1910, subpart Z	Product does not contain ingredients classified as carcinogens
California Proposition 65	Product does not contain ingredients classified as carcinogens
WHO (2003) Nitrate in drinking water	No association between nitrate exposure in humans and the risk of cancer

Assessment/classification: Based on available data, the classification criteria is not met

Other Toxicological Information

This product contains trace amounts of naturally occurring perchlorate and iodate. Like other goitrogenic substances, perchlorate may affect iodine uptake by thyroid under specific conditions.

12. Ecological Information

No data for the mixture, information refers to potassium nitrate and boric acid.

Ecotoxicity

Aquatic Toxicity

Potassium nitrate

96-h LC50	1378 mg/L	*Poecilia retic*ulate (freshwater fish)
24-h EC50	490 mg/L	*Daphnia magna* (freshwater flea)
10 d EC50	>1700 mg/L	Several algae species

Boric acid

96-h LC50	74-725 mg B/L	Fish
48-h EC50	45-1376 mg B/L	Aquatic invertebrates
72-h EC50	40 mg B/L	Algae (*Pseudokirchneriella subcapitata*)

Assessment/classification: Based on available data, the classification criteria are not met

Persistence and degradability

This product contains mainly inorganic nitrate and phosphate salts. In aqueous solutions, these salts dissociate into their respective ions. Phosphate ions are finally incorporated into the P-cycle. Under anoxic conditions, denitrification occurs and nitrate is ultimately converted into molecular nitrogen as part of the Nitrogen cycle.

Bioaccumulative potential

Low potential for bioaccumulation based on physicochemical properties of the main components.

Mobility in soil

The components of this mixture have a low potential for adsorption. Portion not taken up by plants can leach to groundwater.

Other adverse effects

Excess nitrate leaching may enrich waters leading to eutrophication.

13. Disposal Considerations

Disposal should be in accordance with applicable federal and state laws.

It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal method in compliance with applicable regulations.

Waste containing nitrates that exhibit the characteristic of ignitability has the EPA Hazardous Waste Number of D001 according to the Resource Conservation and Recovery Act (RCRA) 40 CFR 261.

14. Transportation Information

US DOT (49CFR part 172)

UN No.	Non dangerous good
UN Proper Shipping Name	Not applicable
Hazard class	Not applicable
Packing group	Not applicable
Hazard label(s)	Not applicable
Special marking	No
Special Provision	No

International Maritime Organization (IMDG Code)

UN No.	Non dangerous good
UN Proper Shipping Name	Not applicable
Hazard Class	Not applicable
Packing group	Not applicable
Marine pollutant	No
Hazard label(s)	Not applicable
Special marking	No
Special Provision	No

Air transport (ICAO-TI/IATA-DGR)

UN No.	Non dangerous good
UN Proper Shipping Name	Not applicable
Hazard class	Not applicable
Packing group	Not applicable
Hazard label(s)	Not applicable
Special marking	No

Special handling procedure

None

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable

Other special precautions

None

15. Regulatory Information

US Federal

SARA Title III Rules

Section 311/312 Hazard Classes

Acute Health Hazard	No
Chronic Health Hazard	No (Boric acid may affect infertility but concentration is below threshold of hazardous material classification per GHS regulations)
Fire Hazard	No
Release of Pressure	No
Reactive Hazard	No

Section 313 Toxic Chemicals

N511 Nitrate compounds (water dissociable; reportable only when in aqueous solution)

Section 302 Extremely Hazardous Substances (EHS)/CERCLA Hazardous Substances

Ingredients not listed

NFPA 704: National Fire Protection Association

Health	1
Fire	0
Reactivity	0
Special	None

US State Regulations

California Proposition 65 Ingredients not listed

California Code of Regulations Title 22 (Health & Safety)
http://www.dtsc.ca.gov/hazardouswaste/percholrate

Chemical Inventories

United States TSCA	All ingredients are listed
Canada DSL	All ingredients are listed
European Union (EINECS)	All ingredients are listed
Japan (METI)	All ingredients are listed

16. Other Information

This SDS complies with 29 CFR part 1910 subpart Z (2012) and ANSI Standard Z400.1-2004

The information contained in this SDS is provided without warranty of any kind, express or implied. The information contained herein is made available solely for consideration, investigation, and verification by the original recipients hereof. Users should consider this information only as a supplement to other information gathered by or available to them. Users should make independent determinations of the suitability and completeness of information from all sources to assure proper use and disposal of these materials for the safety and health of employees, customers, and the environment. This hazard information is not a substitute for risk assessment under actual conditions of use. Users have the responsibility to keep currently informed on chemical hazard information, to design and update their own programs, and to comply with all applicable national, federal, state, provincial, and local laws and regulations regarding safety, occupational health, right to know, and environmental protection.
